Subject: [External] My Recommendations for Task Force Meeting on 10/21
Date: Tuesday, October 19, 2021 4:16:54 PM
Importance: High

It is my recommendation that this committee extends its meeting schedule. I believe that the issues of law enforcement interactions with individuals' constitutional rights are too important to adequately examine during 3 weeks of deliberations. I believe there are substantive issues regarding the impact to officers, to taxpayers and to the State as a whole that must be further examined to come up with meaningful, effective and implementable strategies.

I also believe that the issues in discussion are strongly impacted by the recently passed and signed HB 3653, Safe-T Act. This Act has not fully gone into effect. This Act makes it much easier to punish bad officers. This Act will generate body camera footage and other evidence that will be impactful in examining the conduct of officers. This Act empowers the Attorney General to investigate and take action against departments that act in an inappropriate and unconstitutional manner.

I do not believe that the Safe-T Act is the end of important conversations about police and their interactions with their communities, but I do believe this Act needs time to become fully effective in order for us to understand the full impact and effects on those interactions. I believe that to further upend law enforcement by pursuing a major change to a doctrine created under federal law and made available to all public employees, including elected officials, threatens the effective roll out of the most important instance of police reform in the nation.

Simply, I make the recommendation to extend the timeline and to continue to have meaningful dialogue aimed at ensuring the constitutional rights of all individuals are protected by all involved parties.
