Research and Program Evaluation in Illinois: The Extent and Nature of Drug and Violent Crime in Illinois' Counties

A Profile of the McLean County Criminal and Juvenile Justice Systems

This project was supported by Grant # 02-DB-MU-0017, awarded to the Illinois Criminal Justice Information Authority by the Bureau of Justice Assistance, Office of Justice Programs, U.S. Department of Justice. The Assistant Attorney General, Office of Justice Programs, coordinates the activities of the following programs, offices and bureaus: Bureau of Justice Assistance, Bureau of Justice Statistics, National Institute of Justice, Office of Juvenile Justice and Delinquency Prevention, and the Office for Victims of Crime. Points of view or opinions contained within this document are those of the authors and do not necessarily represent the official position or policies of the U.S. Department of Justice.

FOREWORD

The Illinois Criminal Justice Information Authority is a state agency created in 1983 to promote community safety by providing public policymakers, criminal justice professionals and others with information, tools and technology needed to make effective decisions that improve the quality of criminal justice in Illinois. The Authority provides an objective system-wide forum for identifying critical problems in criminal justice, developing coordinated and cost-effective strategies, and implementing and evaluating solutions to those problems. The specific powers and duties of the Authority are delineated in the Illinois Criminal Justice Information Act (Illinois Compiled Statutes, Ch. 20, Sec. 393/7). Two of the Authority's many responsibilities are serving as a clearinghouse of information and research on criminal justice and undertaking research studies to improve the administration of criminal justice.

Since 1989, the Authority's Research and Analysis Unit has received funds under the federal Anti-Drug Abuse Act of 1988 to document the extent and nature of drug and violent crime in Illinois and the criminal justice system's response to these offenses. As a result of these efforts, the Authority has amassed a large amount of data measuring the extent and nature of drug and violent crime in Illinois and the impact these crimes have had on the criminal justice system. To put this information into the hands of Illinois' criminal justice policymakers in a useful summary format, the Authority's Research and Analysis Unit has developed profiles of the criminal justice system for each county in Illinois. In 1994, the Illinois Criminal Justice Information Authority produced a series of reports detailing criminal justice system activity levels for each of Illinois' 102 counties. As a result of the positive response by local criminal justice officials, in 1996 the Authority updated and expanded the scope of these reports to reflect current criminal and juvenile justice activity. It is hoped that these 2004 updated reports will be as valuable, if not more, than the original versions. In addition to providing policymakers with an overview of activities across the components of the justice system in their county (law enforcement, courts and corrections), the profiles also provide perspective by including trends experienced in counties with similar population sizes.

While the data presented in this report are by no means inclusive of all indicators, they do provide a general overview of crime and the criminal justice system's response. In addition, these data are readily available and consistently defined through existing statewide data collection mechanisms.

The information presented in this profile has been provided to the Authority by a number of state agencies, specifically: the Illinois State Police, the Administrative Office of the Illinois Courts, the Illinois Department of Corrections, and the Illinois Department of Children and Family Services. The support and cooperation of these agencies and their staffs have helped make this report an informative and timely source of information on the activities of the criminal justice system in Illinois.

The Illinois Criminal Justice Information Authority's
Web-based clearinghouse of criminal justice data available at:

<http://www.icjia.state.il.us>.

I. Introduction

McLean County, located in central Illinois, covers an area of 1,183 square miles and had a 2003 population of 156,879, according to estimates by the U.S. Department of Commerce's Bureau of the Census. Using these figures, McLean County was the largest county in Illinois geographically, but 13th largest in terms of population. Combining these two measures, McLean County had the 21st highest population density per square mile among Illinois' 102 counties.

As with the previous reports, information specific to McLean County is presented in comparison with similar counties. To provide more useful comparisons, counties have been separated into four types; 1) Cook County, 2) Collar counties, 3) urban counties (outside of Cook and the Collar counties), and 4) rural counties. Because of its size, Cook County is compared to the rest of the state. The Collar counties are the five that border Cook County (DuPage, Lake, Kane, McHenry, and Will). Urban and rural counties are defined by whether or not they lay within a Metropolitan Statistical Area (MSA) (Appendix 1, page 24). Based on these definitions, there are 36 counties in Illinois that are part of a MSA (Cook, Collar, and urban counties) and 66 counties that are not part of a MSA (in other words, rural).

Recent changes to the standard definitions of MSAs have affected the classification of several Illinois counties. The United States Office of Management and Budget (OMB) defines metropolitan and micropolitan statistical areas according to published standards that are applied to Census Bureau data. The general concept of a metropolitan or micropolitan statistical area is that of a core area containing a substantial population nucleus, together with adjacent communities having a high degree of economic and social integration with that core. Currently defined metropolitan and micropolitan statistical areas are based on the application of 2000 standards to 2000 decennial census data and were announced by OMB on June 6, 2003.

Standard definitions of metropolitan areas have changed over time. The term "metropolitan area" (MA) was adopted in 1990 and referred collectively to metropolitan statistical areas (MSAs), consolidated metropolitan statistical areas (CMSAs), and primary metropolitan statistical areas (PMSAs). More recently, the term "core based statistical area" (CBSA) became effective in 2000 and refers collectively to metropolitan and micropolitan statistical areas.

The 2000 standards require that each CBSA must contain at least one urban area of 10,000 or more population. Each metropolitan statistical area must have at least one urbanized area of 50,000 or more inhabitants. Each micropolitan statistical area must have at least one urban cluster of at least 10,000 but less than 50,000 population.

Under the standards, the county (or counties) in which at least 50 percent of the population resides within urban areas of 10,000 or more population, or that contain at least 5,000 people residing within a single urban area of 10,000 or more population, is identified as a "central county" (counties). Additional "outlying counties" are included in the CBSA if they meet specified requirements regarding residents commuting to or from the central counties.

Changes in the definitions of these statistical areas since the 1950 census have consisted chiefly of: 1) the recognition of new areas as they reached the minimum required city or urbanized area population, and 2) the addition of counties to existing areas due to new decennial census data. In some instances, formerly separate areas have been merged, components of an area have been transferred from one area to another, or components have been dropped from an area. The large majority of changes have taken place on the basis of decennial census data.

Because of these historical changes in geographic definitions, users must be cautious in comparing data for these statistical areas from different dates. For more information, contact the Population Distribution Branch at (301) 763-2419 (U. S. Census Bureau).

Based on these characteristics, McLean County is one of Illinois' 30 urban counties. Throughout this report, the criminal justice activity trends experienced in McLean County will be compared to those trends experienced in the other urban counties. This comparison will be realized through the calculation of rates for the activities being analyzed, with the number per 100,000 population the format for all the rates.

II. Law Enforcement Activities in McLean County

One of the most commonly used indicators of the level of crime in a particular jurisdiction is the number of *Index offenses* reported to the police. There are eight separate offenses that constitute the Crime Index, including murder, criminal sexual assault, robbery, aggravated assault (violent Index offenses), burglary, theft, motor vehicle theft, and arson (property Index offenses). Although these eight offenses do not account for all crimes reported to the police, they are considered to be the most serious, frequent, pervasive, and consistently defined by different law enforcement agencies.

An indicator of the workload that law enforcement agencies place on other components of the justice system is the number of arrests made by police, including those for violent and property Index offenses and drug offenses. Unlike offenses, which are what police must respond to, arrests represent those offenders who may eventually be processed through other components of the justice system, including the courts, county jails, and state and local correctional programs.

In addition to local law enforcement agencies, Task Force 6 (TF6) serves McLean County. Throughout most of the period analyzed, there were 21 Metropolitan Enforcement Groups (MEGs) and task forces operating in Illinois. A county is considered to be served by a MEG or task force if at least one law enforcement agency within that county participated in that MEG or task force either by providing personnel or financial resources.

To learn more about the drug enforcement activities of Task Force 6 and Illinois' other MEGs and task forces, profiles of each of the units were developed by the Authority's Research and Analysis Unit and are available through the Authority's Criminal Justice Information Clearinghouse or can be downloaded from the Authority's Website at www.icjia.state.il.us.

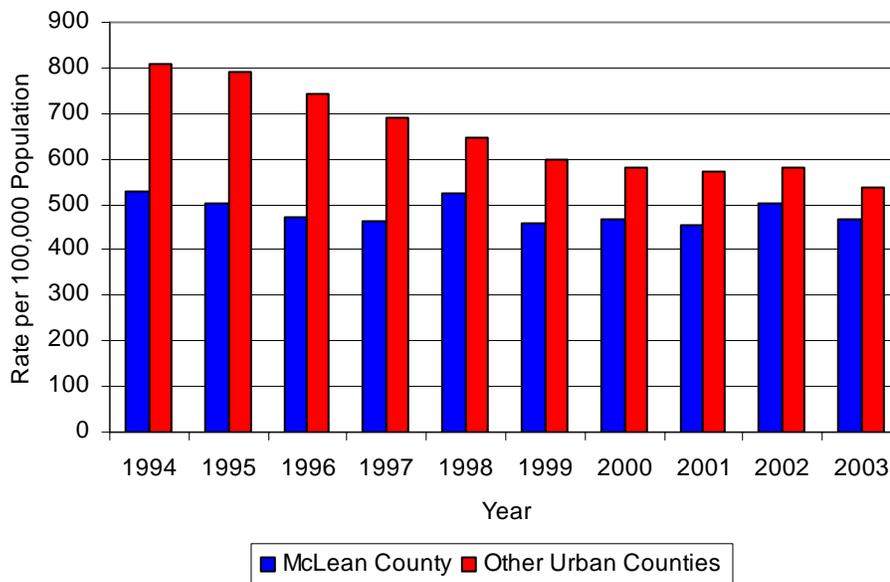

Violent Index Offenses Reported to the Police in McLean County

The number of violent Index offenses reported to the police increased slightly in McLean County between 1994 and 2003, from 732 to 734. As in previous years and in most other counties, aggravated assault offenses accounted for the majority (70 percent) of violent Index offenses reported in McLean County in 2003.

Between 1994 and 2003, the violent Index offense rate in McLean County decreased 11 percent from 528 to 468 offenses per 100,000 population (Figure 1). During that same period, the violent Index offense rate in the other urban counties has decreased 33 percent, from 808 to 537 offenses per 100,000 population. The 2003 violent Index offense rate in McLean County was 13 percent lower than the rate in the other urban counties.

Figure 1

Total Violent Index Offense Rates in McLean and Other Urban Counties

Source: ICJIA calculation using Illinois State Police and U.S. Census Bureau data

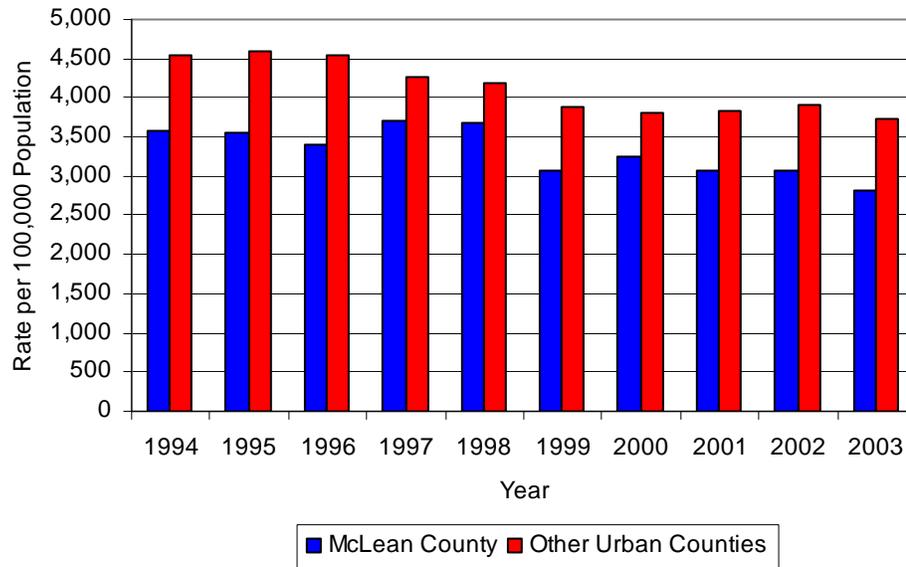

Property Index Offenses Reported to the Police in McLean County

Between 1994 and 2003, the number of property Index offenses reported to the police in McLean County decreased 11 percent, from 4,966 to 4,402. Thefts accounted for 71 percent of all property Index offenses reported in McLean County during 2003.

Between 1994 and 2003, the property Index offense rate in McLean County decreased 22 percent, from 3,583 to 2,806 offenses per 100,000 population (Figure 2). In the other urban counties, the property Index offense rate decreased 18 percent, from 4,539 to 3,730 offenses per 100,000 population. The 2003 property Index offense rate in McLean County was 25 percent lower than the rate in the other urban counties.

Figure 2

Total Property Index Offense Rates in McLean and Other Urban Counties

Source: ICJIA calculation using Illinois State Police and U.S. Census Bureau data

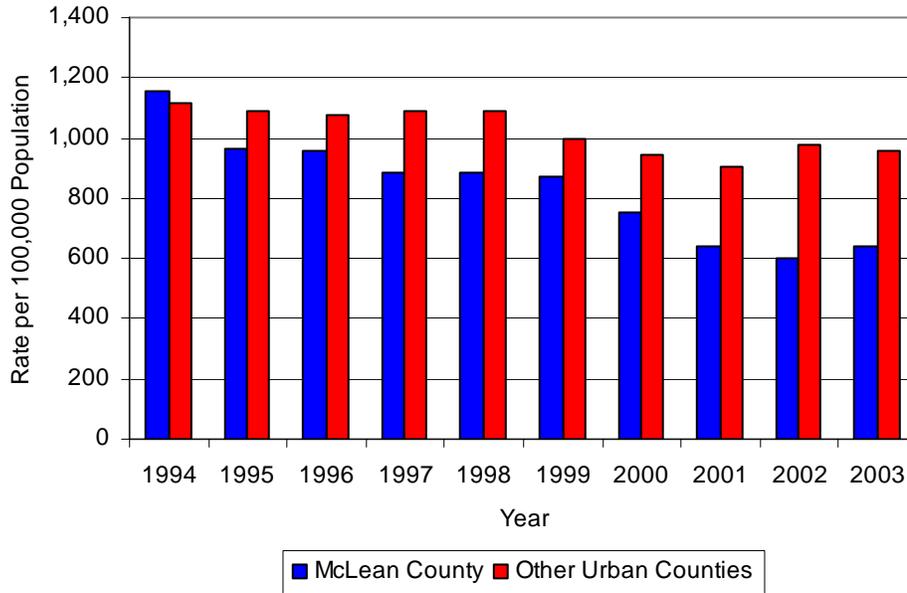

Index Arrests by McLean County Law Enforcement Agencies

Between 1994 and 2003, arrests for total Index offenses by law enforcement agencies in McLean County decreased 19 percent, from 1,601 to 1,010. The majority of Index arrests were for property Index offenses. Of the 1,010 Index arrests made in McLean County during 2003, 33 percent were for violent Index crimes and 67 percent were for property Index crimes. Arrests for theft and aggravated assault accounted for the majority of property and violent Index arrests in McLean County during 2003. Of all violent Index arrests, 87 percent were arrests for aggravated assault, while thefts accounted for 69 percent of all property Index arrests.

Between 1994 and 2003, the Index arrest rate in McLean County decreased 44 percent, from 1,155 to 644 arrests per 100,000 population (Figure 3). During the same period, the Index arrest rate in the other urban counties decreased 14 percent, from 1,116 to 960 arrests per 100,000 population. In 2003, McLean County's Index arrest rate was 33 percent lower than the Index arrest rate in the other urban counties.

Figure 3

Index Arrest Rates in McLean and Other Urban Counties

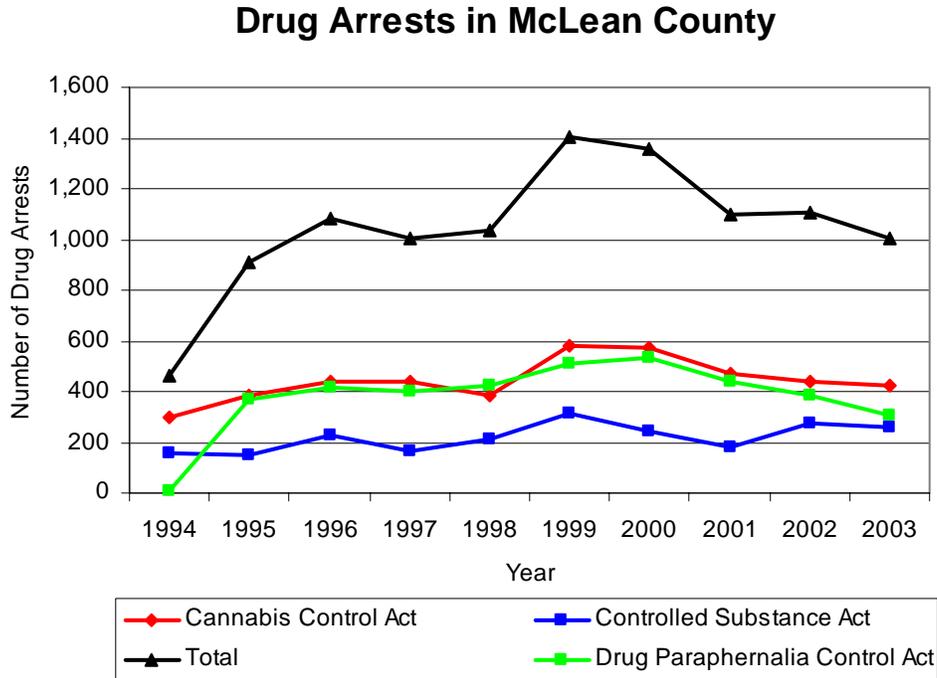

Source: ICJIA calculation using Illinois State Police and U.S. Census Bureau data

Drug Offense Arrests in McLean County

Between 1994 and 2003, arrests for total drug offenses (including violations of Illinois' Cannabis Control Act, Controlled Substances Act, Drug Paraphernalia Control Act, and the Hypodermic Syringes and Needles Act) more than doubled in McLean County, from 466 to 1,004 (Figure 4). Total drug arrests in McLean County remained relatively stable between 1983 and the early 1990s, before increasing annually nearly every year thereafter until 1999 and then began to decline. Drug Paraphernalia Control Act violations accounted for the majority of the increase in total drug arrests. Between 1994 and 2003, the number of arrests for violation of the Drug Paraphernalia Control Act increased dramatically, from six arrests in 1994 to 303 in 2003, or in other words, 30 percent of all drugs arrests in 2003.

Between 1994 and 2003, arrests for violations of Illinois' Cannabis Control Act (which prohibits the possession, sale, and cultivation of cannabis) in McLean County have consistently outnumbered arrests for violations of the Controlled Substances Act (which prohibits the possession, sale, distribution, or manufacture of all other illegal drugs such as cocaine and opiates). Between 1994 and 2003, the number of arrests for violations of the Cannabis Control Act in McLean County increased 43 percent, from 296 to 422. Arrests for violations of the Controlled Substances Act increased, from 158 to 258, between 1994 and 2003, a 63 percent increase (Figure 4).

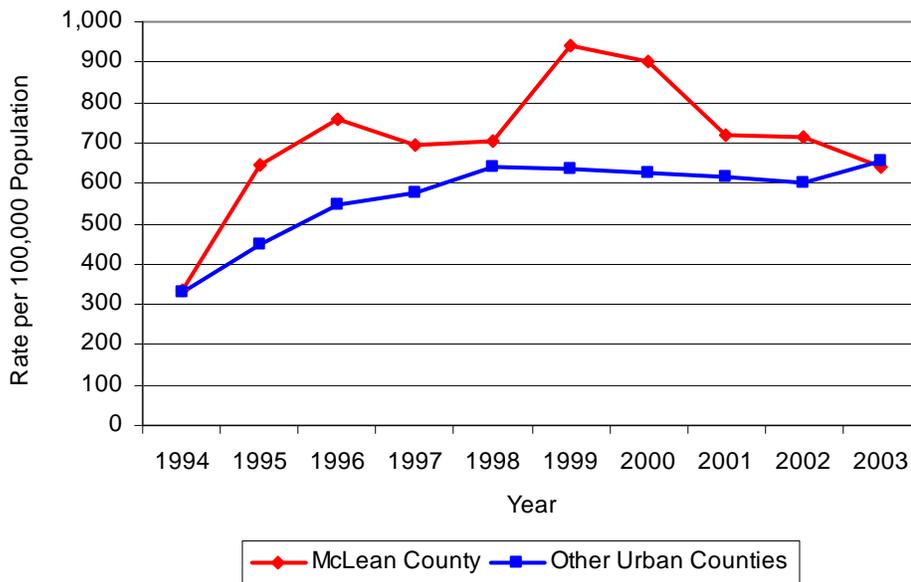

Figure 4

Source: Illinois State Police

Between 1994 and 2003, the arrest rate for all drug law violations in McLean County nearly doubled, from 336 to 640 per 100,000 population (Figure 5). Similarly, the total drug arrest rate in the other urban counties nearly doubled between 1994 and 2003, from 329 to 655 per 100,000 population, a 99 percent increase. In 2003, the drug arrest rate in McLean County was 2 percent lower than the rate in the other urban counties.

Figure 5
Drug Arrest Rates in McLean
and Other Urban Counties

Source: ICJIA calculation using Illinois State Police and U.S. Census Bureau data

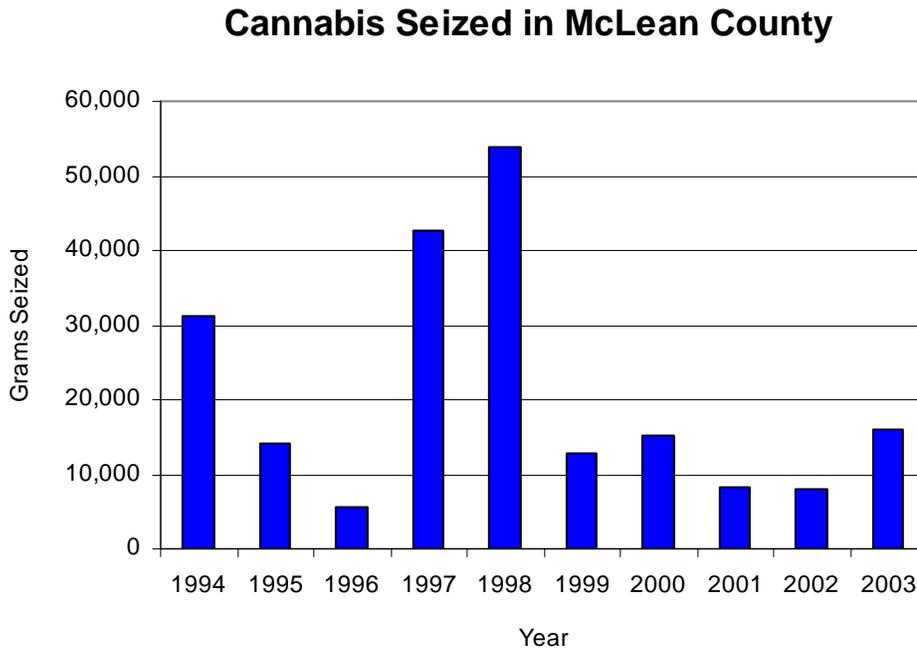

Drugs Seized in McLean County

Drugs seized by law enforcement agencies are another indicator of the extent and nature of the illegal drug trade in a jurisdiction. When illegal drugs are seized by law enforcement agencies in Illinois, they are submitted to a crime lab for analysis. Most agencies submit drugs to one of the Illinois State Police crime labs. These labs record the quantity of drugs submitted from each county. This section discusses the quantities of illegal drugs seized and submitted to the Illinois State Police from law enforcement agencies in McLean County.

Cannabis Seized in McLean County

Cannabis accounts for the majority of drugs seized in McLean County and in most Illinois jurisdictions. Between 1994 and 2003, the quantity of cannabis seized in McLean County decreased 48 percent, from 31,076 grams to 16,098 grams. During the period between 1994 and 2003, the quantity of cannabis seized in the other urban counties decreased 61 percent, from 1,280,690 grams to 498,535 grams (Figure 6).

Figure 6

Source: Illinois State Police

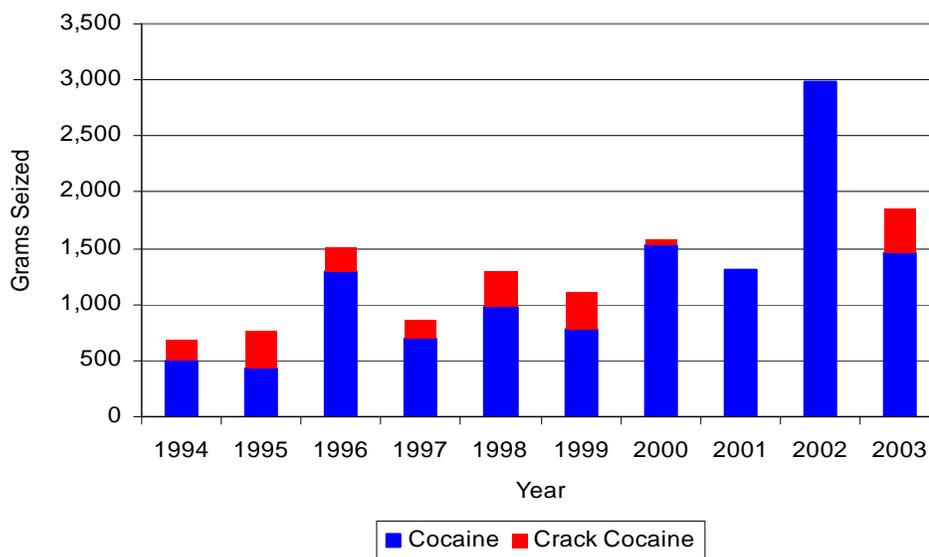

Between 1994 and 2003, the cannabis seizure rate in McLean County decreased 54 percent, from 22,419 grams per 100,000 population in 1994 to 10,262 grams in 2003. The cannabis seizure rate in the other urban counties decreased 62 percent, from 52,821 grams per 100,000 population in 1994 to 19,828 grams in 2003. In 2003, McLean County's cannabis seizure rate was 48 percent lower than the rate in the other urban counties.

Cocaine and Crack Cocaine Seized in McLean County

The quantity of powder cocaine and crack cocaine seized in McLean County increased dramatically between 1994 and 2003. The quantity of powder cocaine seized nearly tripled, from 503 grams in 1994 to 1,459 grams in 2003 (Figure 7). Although crack cocaine accounted for a relatively small portion of all cocaine seized in McLean County during most of the period analyzed, the quantity of crack cocaine more than doubled, from 179 grams in 1994 to 406 grams in 2003. As a result, crack cocaine accounted for 22 percent of all cocaine seized in McLean County in 2003.

Figure 7

Cocaine and Crack Cocaine Seized in McLean County

Source: Illinois State Police

The quantity of powder cocaine and crack cocaine seized in the other urban counties decreased during the period analyzed. Between 1994 and 2003, the amount of powder cocaine seized decreased 27 percent, from 47,911 grams to 35,115 grams in the other urban counties, while the quantity of crack cocaine seized decreased 48 percent, from 11,260 grams to 5,884 grams. In 2003, 930 grams of powder cocaine per 100,000 population were seized in McLean County, 33 percent lower than the 1,397 grams of powder cocaine per 100,000 population seized in the other urban counties. The rate of crack cocaine seized in McLean County increased from 129 grams per 100,000 population in 1994 to 259 grams per 100,000 population, compared to the rate in the other urban counties, which decreased from 464 to 234 grams per 100,000 between 1994 and 2003.

III. Adult and Juvenile Court Activity in McLean County

Although Illinois has one of the best court reporting systems in the country, the Administrative Office of the Illinois Courts only collects information regarding the aggregate number of court filings, dispositions, and probation caseloads. Currently, there are no statewide data available on court filings, dispositions, and convictions by offense type. However, detailed offense data are available from the Illinois Department of Corrections for those convicted felons sentenced to prison.

Trends in the number of delinquency petitions filed and adjudicated in juvenile court are also presented. Illinois statutes define delinquency offenses as those committed by someone younger than 17 years old that would be considered crimes if committed by someone 17 years of age or older.

In Illinois, county probation departments are overseen by the Administrative Office of the Illinois Courts' Probation Division. This section also presents data on active misdemeanor and felony adult caseloads and the number of juveniles under the supervision of the probation departments in McLean County and the other urban counties.

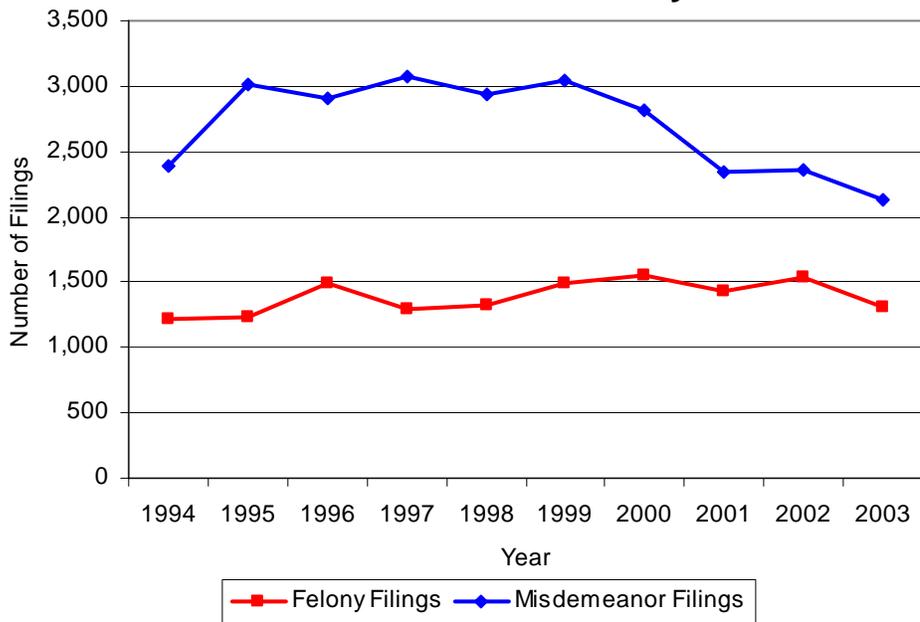

Misdemeanor and Felony Filings in McLean County

The Administrative Office of the Illinois Courts reports data on criminal court cases in two categories: misdemeanors and felonies. After screening a case and deciding it warrants further action, the state's attorney must file formal charges in court. Misdemeanor cases are less serious than felonies and can be punished by a probation sentence of one year or less and less than one year of incarceration. Felony cases, on the other hand, are more serious and can be punished by a probation term up to four years and incarceration for more than one year. When comparing the number of filings across time and across counties, it should be noted that differences in reporting practices exist. For example, when two or more defendants are involved in a single case, some state's attorneys file a single case charging all defendants, while others file a separate case for each suspect.

In 2003, felony and misdemeanor court filings accounted for 7 percent of all filings in McLean County's courts (civil, traffic, family, and other). Between 1994 and 2003, the number of felony filings in McLean County increased 8 percent, from 1,214 to 1,307 (Figure 8). During the same period, misdemeanor filings decreased 11 percent, from 2,384 in 1994 to 2,128 in 2003. In 2003, misdemeanor filings out-numbered felony filings nearly two to one.

Figure 8

**Felony and Misdemeanor Filings
in McLean County**

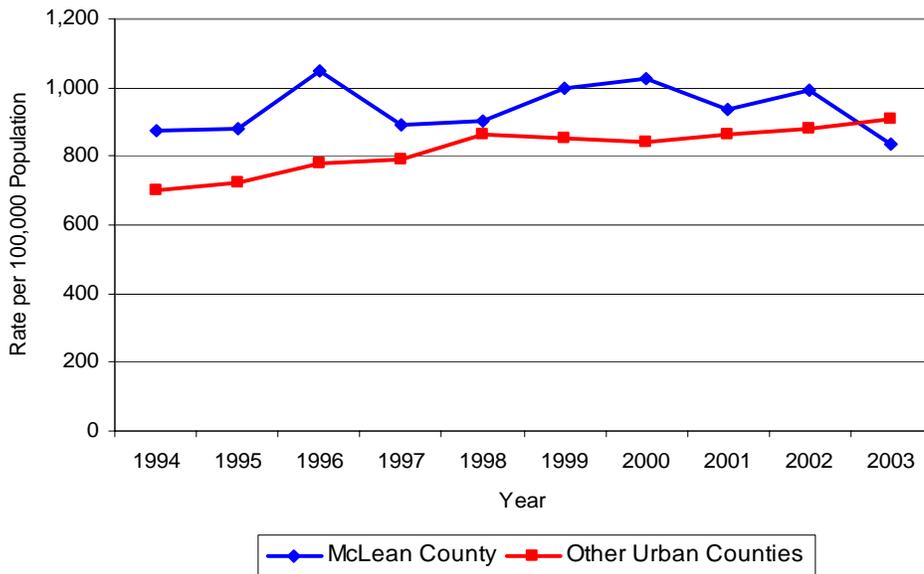

Source: Administrative Office of the Illinois Courts

Between 1994 and 2003, the felony-filing rate in McLean County decreased 5 percent, from 876 to 833 cases per 100,000 population (Figure 9). The felony-filing rate in the other urban counties increased 30 percent during this period, from 698 to 910 cases per 100,000 population. In 2003, the felony-filing rate in McLean County was 8 percent lower than the rate in the other urban counties.

Figure 9

Felony Filing Rates in McLean and Other Urban Counties

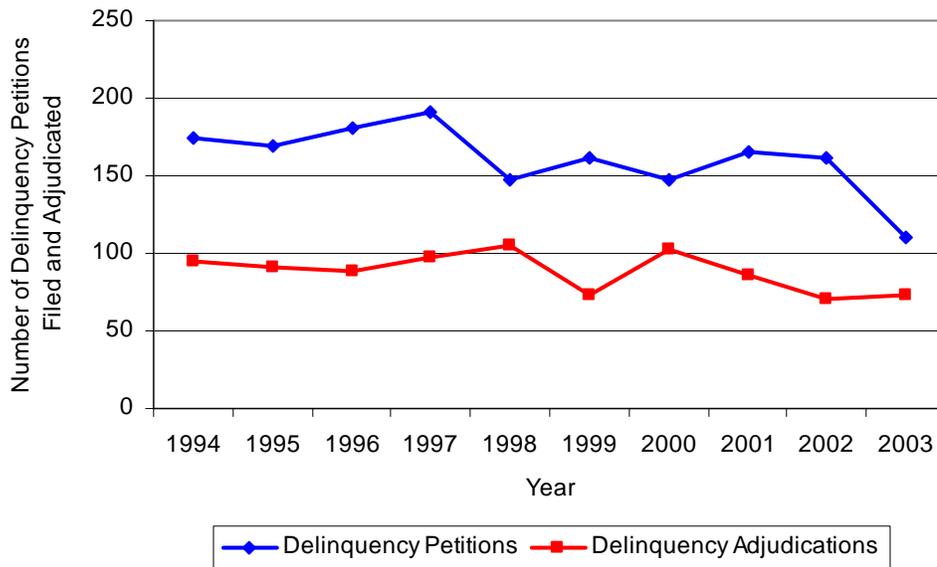

Source: Administrative Office of the Illinois Courts and U.S. Census Bureau data

Illinois’ juvenile court system differs in several key aspects from the adult criminal court system. One aspect revolves around the difference in treatment between juveniles and adults: the juvenile court process is somewhat less formal and adversarial; authorities are given much more latitude in determining the proper response to each case. Traditionally, the terminology used to describe juvenile proceedings has been less harsh than that used for the adult criminal process. For example, Illinois’ juvenile courts accept “petitions of delinquency” rather than misdemeanor or felony criminal complaints. However, pursuant to the Juvenile Court Reform Act of 1998, criminal court terms, such as “trial” and “sentencing,” have replaced the less harsh “adjudicatory hearing” and “dispositional hearing” terms.

Between 1994 and 2003, the number of juvenile delinquency petitions filed in McLean County decreased 37 percent, from 174 to 110 (Figure 10). In 2003, 66 percent of the juveniles named in delinquency petitions were adjudicated delinquent. During the same period, delinquency adjudications decreased 23 percent, from 95 to 73. The majority of the cases not resulting in an adjudication were continued under supervision.

Figure 10

Juvenile Delinquency Petitions Filed and Adjudicated in McLean County

Source: Administrative Office of the Illinois Courts

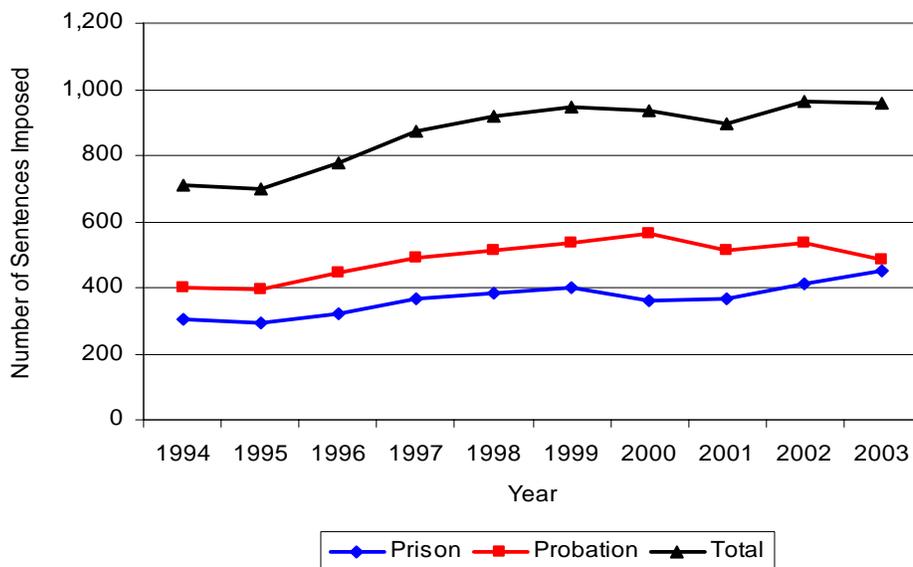

Between 1994 and 2003, the delinquency petition-filing rate in McLean County decreased 43 percent, from 1,417 to 813 per 100,000 juveniles. During the same period, the delinquency petition-filing rate in the other urban counties decreased 6 percent, from 1,906 to 1,793 petitions per 100,000 juveniles. In 2003, the delinquency petition-filing rate in McLean County was 55 percent lower than the rate in the other urban counties.

Anyone convicted of a felony in Illinois can be sentenced either to prison or probation, or receive a conditional discharge. A number of factors influence the type and length of sentence imposed on convicted felons, including the severity of the crime, the offender’s criminal and social history, safety of the community, and legislation affecting certain types of offenses. For some types of convictions a sentence to prison is required by state statute.

Between 1994 and 2003, the number of offenders convicted of a felony and sentenced in McLean County increased 35 percent, from 708 to 957 (Figure 11). The number of convicted felons sentenced to prison increased 47 percent, from 306 to 452, while the number of convicted felons sentenced to probation increased 21 percent, from 402 to 486. Although the number of felons sentenced to prison and probation increased, felony prison sentences increased while probation sentences decreased slightly as a proportion of total sentences. In 1994, 43 percent of all convicted felons were sentenced to prison, compared to 47 percent in 2003. Between 1994 and 2003, the proportion of felons sentenced to probation decreased from 57 percent in 1994 to 51 percent in 2003. In 2003, 2 percent of convicted felons were sentenced to something other than prison or probation.

Figure 11

Sentences Imposed on Felons Convicted in McLean County

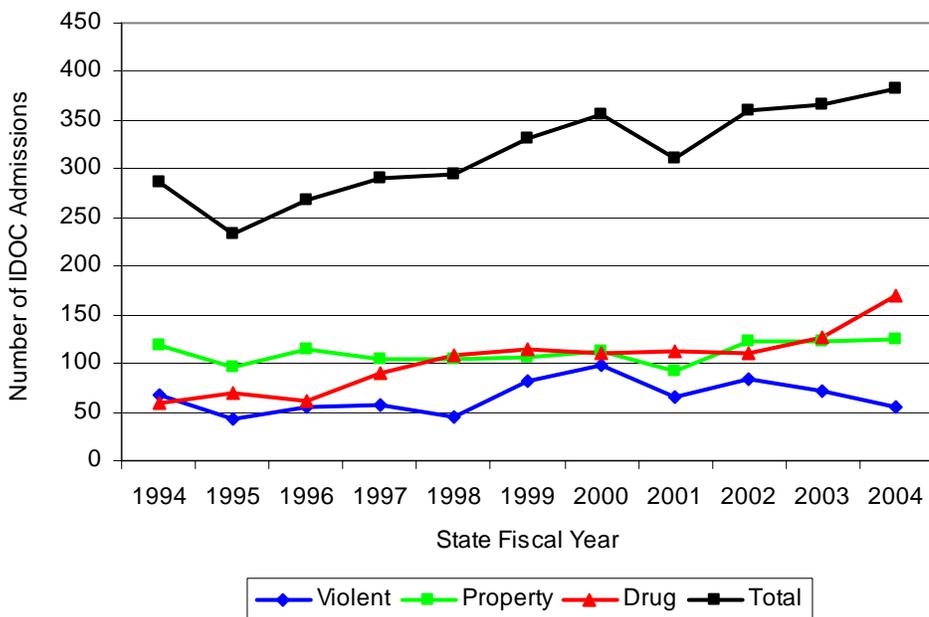

Source: Administrative Office of the Illinois Courts

Adult Prison Admissions from McLean County

Between State Fiscal Years (SFYs) 1994 and 2004, the number of admissions to the Illinois Department of Corrections' Adult Division from McLean County increased 34 percent, from 286 to 382 (Figure 12). During this period, the number of violent offender admissions decreased, while drug offender and property offender admissions increased. The number of violent offender admissions decreased 19 percent between SFYs 1994 and 2004, from 68 to 55, while property offender admissions increased 4 percent, from 119 to 124. On the other hand, the number of drug offender admissions more than doubled, from 60 in SFY 1994 to 169 in SFY 2004.

Figure 12

New Court Commitments from McLean County, by Offense Type

Source: Illinois Department of Corrections

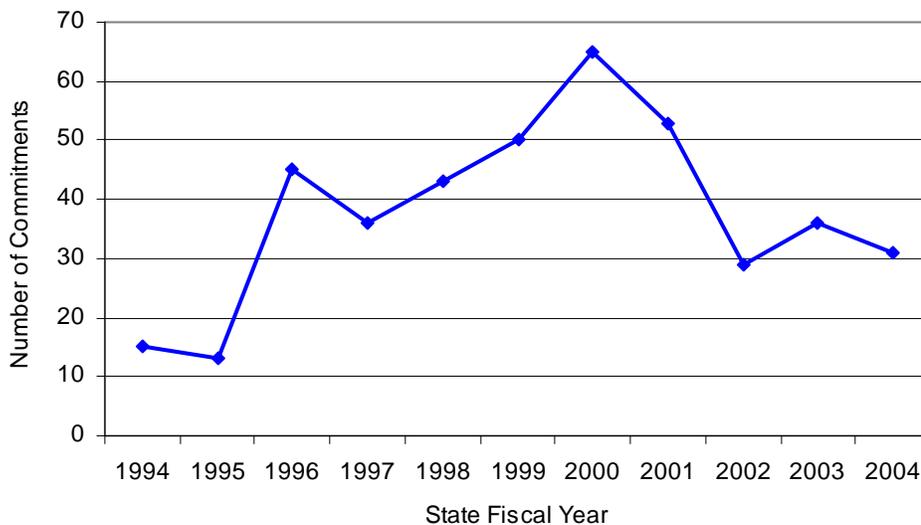

Violent and property offenders from McLean County accounted for a decreased proportion of total admissions between SFYs 1994 and 2004. Violent offenders accounted for 14 percent of all admissions from McLean County in SFY 2004, compared to 24 percent in SFY 1994, while property offenders accounted for 32 percent of all admissions in SFY 2004, compared to 42 percent in SFY 1994. Conversely, the proportion of all admissions accounted for by drug offenders increased during the same period. Between SFYs 1994 and 2004, the proportion of all admissions accounted for by drug offenders increased from 21 percent in SFY 1994 to 44 percent in SFY 2004. Drug offender admissions accounted for the largest proportion of all admissions from McLean County in SFY 2004.

Juvenile Court Commitments to the Illinois Department of Corrections

The Illinois Department of Corrections' Juvenile Division provides long-term custody for youths, 13 to 17 years old, who have been found delinquent by the juvenile court and committed to the IDOC. Youths may remain in an IDOC juvenile facility until they are 21. Between SFYs 1994 and 2004, the number of court commitments to the IDOC's Juvenile Division from McLean County more than doubled, from 15 to 31 (Figure 13).

Figure 13

Juvenile Court Commitments to the IDOC Juvenile Division from McLean County

Source: Illinois Department of Corrections

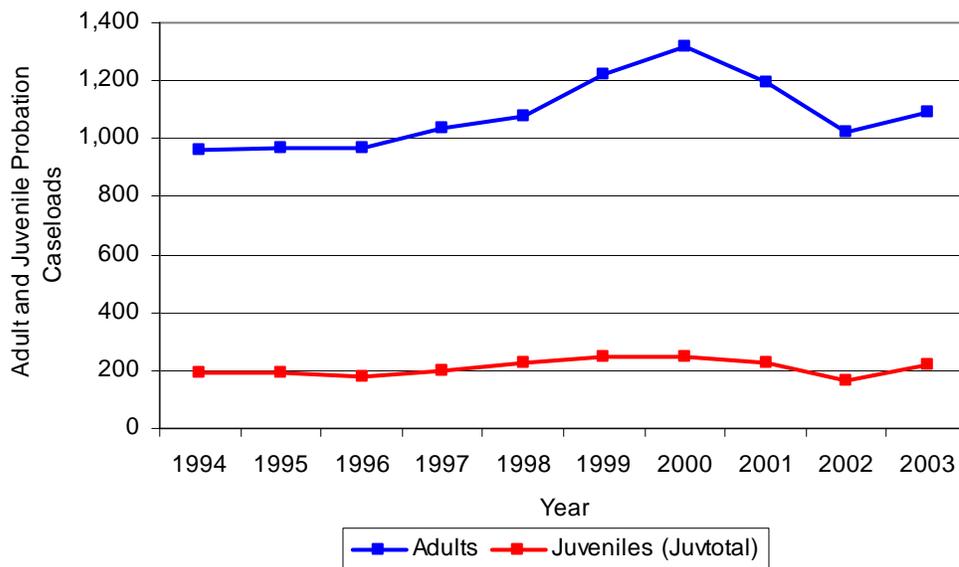

In SFY 2004, McLean County's rate of commitments to the IDOC's Juvenile Division of 284 commitments per 100,000 juveniles was 4 percent lower than the 296 commitments per 100,000 juveniles from the other urban counties.

Adult and Juvenile Probation Caseloads in McLean County

Between December 31, 1994 and December 31, 2003, the number of active adult probation cases in McLean County increased 13 percent, from 964 to 1,089 (Figure 14). In 2003, felony offenders accounted for 71 percent of McLean County's active adult probation caseload. Between 1994 and 2003, the number of juveniles supervised by the McLean County Juvenile Probation Department increased 15 percent, from 193 to 221. By comparison, the number of active adult probation cases in the other urban counties increased 30 percent between 1994 and 2003, while the juvenile probation caseloads increased 37 percent.

Figure 14

Total Adult and Juvenile Active Probation Cases in McLean County

Source: Administrative Office of the Illinois Courts

The active adult probation caseload rate per 100,000 population in McLean County remained stable between 1994 and 2003 at 695 cases per 100,000 population. During that same period, the active adult probation caseload rate increased 25 percent in the other urban counties, from 652 to 818 cases per 100,000 population. In 2003, the active adult probation caseload rate in McLean County was 15 percent lower than the rate in the other urban counties.

IV. Jail Populations in McLean County

Jail data in Illinois are collected by the Illinois Department of Corrections' Bureau of Inspections and Audits. As with court data, data are not available detailing the specific offenses for which offenders were held in county jails. In addition, between SFYs 1992 and 1994, the IDOC did not collect Illinois jail population data. Data presented SFY 1994 were estimated by the Authority using the reported SFYs 1991 and 1995 data.

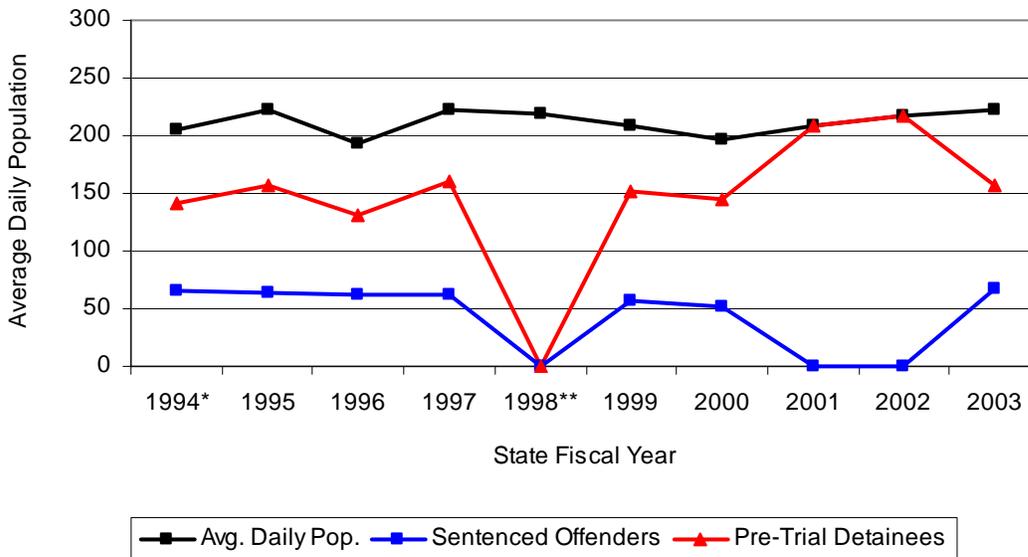

Average Daily Population of the McLean County Jail

The McLean County Jail was one of 91 county jails in operation in Illinois during State Fiscal Year 2003. There are 11 counties that did not operate a jail of their own; they rely on other counties to house their pretrial detainees and sentenced offenders at either a per-diem or contracted rate.

Between SFYs 1994 and 2003, the average daily population of the McLean County Jail increased 9 percent, from 206 to 223 inmates (Figure 15). During this period, pretrial detainees (those individuals who have been arrested for a crime and are awaiting trial) accounted for an increased percentage of the average daily population, increasing from 69 percent in SFY 1994 to 70 percent in SFY 2003. On the other hand, sentenced offenders (those offenders who have been convicted and sentenced to the county jail) accounted for a decreased percentage, decreasing from 31 percent in SFY 1994 compared to 30 percent in SFY 2003.

Between State Fiscal Years 1994 and 2003, the average daily jail population rate in McLean County decreased 4 percent, from 148 to 142 per 100,000 population (Figure 16). During this same period, the average daily jail population rate in the other urban counties increased 38 percent, from 111 to 153 per 100,000 population. In SFY 2003, the McLean County Jail average daily jail population rate was 7 percent lower than the SFY 2003 rate in the other urban counties.

V. Indicators of Child Abuse and Neglect in McLean County

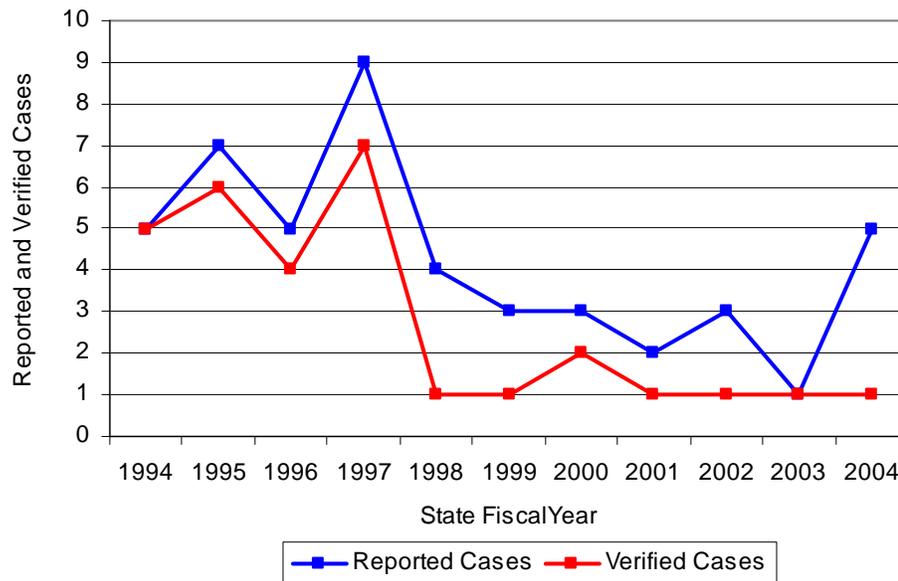

Substance-Exposed Infants in McLean County

Illinois continues to experience the effects of prenatal substance abuse. In Illinois, if a baby is born and thought to have been exposed to illegal substances or alcohol, either through observation by physicians or toxicology tests, the case is reported to the Illinois Department of Children and Family Services (DCFS). These cases are then investigated by DCFS to verify the child's prenatal exposure to either alcohol or illegal substances. Between State Fiscal Years 1994 and 2004, 96 of Illinois' 102 counties reported at least one case of a substance-exposed infant.

Between State Fiscal Years 1994 and 2004, the number of reported cases of substance-exposed infants reported in McLean County remained unchanged at five. During the same period, the number of verified cases of substance-exposed infants decreased from five in SFY 1994 to one in SFY 2004 (Figure 17).

Between State Fiscal Years 1994 and 2004, the number of reported cases of substance-exposed infants in the other urban counties decreased 42 percent, from 359 to 210, while the number of verified cases of substance-exposed infants also decreased 42 percent, from 337 to 195.

Child Abuse and Neglect Cases Reported and Verified in McLean County

Recent research on the relationship between maltreatment of youth and delinquency has revealed an important distinction between child maltreatment and adolescent maltreatment. Using data from the Office of Juvenile Justice and Delinquency Prevention’s Program of Research on the Causes and Correlates of Delinquency, researchers have found that youth that were abused during childhood (12 years of age or less) were no more likely to become delinquent than youth who were not abused, but youth who were abused during adolescence (after age 12) were significantly more likely to be delinquent.¹ While prior child abuse may not be linked to juvenile delinquency, studies examining prior child abuse have shown that childhood victimization may be linked to other poor outcomes in youth, including low academic achievement, teenage parenthood (particularly for females), drug use, and symptoms of mental illness.² Additionally, research examining adolescent victimization (including physical and sexual assaults) and adult outcomes has found a correlation between previous victimization and substance abuse, depression, and post-traumatic stress disorder in adulthood.³ In Illinois, DCFS investigates reported cases of child abuse.

Between State Fiscal Years 1994 and 2004, the number of child abuse and neglect cases reported in McLean County decreased 5 percent, from 1,602 to 1,519 (Figure 18). During that same period, 7,228 cases, or 40 percent of all cases reported, were verified by a DCFS investigation. Verified cases of child abuse and neglect in McLean County decreased 10 percent between SFYs 1994 and 2004, from 684 to 613.

Between State Fiscal Years 1994 and 2004, the rate of verified cases of child abuse and neglect in McLean County decreased from 2,098 to 1,737 per 100,000 juveniles, a 17 percent decrease (Figure 19). During the same period, the rate of verified child abuse and neglect cases decreased 30 percent in the other urban counties, from 1,882 to 1,313 per 100,000 juveniles. In SFY 2004, the rate of verified cases of child abuse and neglect in McLean County was 32 percent higher than in the other urban counties.
