

## Probation data

**Probation** departments in Illinois provide services to youth adjudicated delinquent and alleged youth offenders whose cases are diverted from the juvenile court. Probation departments can provide **informal probation** supervision to alleged youth offenders on whom no delinquency petition has been filed. Additionally, probation departments can oversee youth whose cases are petitioned to court but have not been formally adjudicated. These types of probation cases or petitions may receive a **continuance under court supervision order**, requiring youth monitoring by the probation department for up to 24 months. While on supervision, the youth must meet special conditions, such as attending counseling sessions or completing community service work. The case is dismissed if the youth successfully completes the provisions of his or her supervision.

The primary function of **formal probation** is to provide the court with investigative and case supervision services for adjudicated delinquents. Youth adjudicated delinquent can be sentenced to probation for a maximum of five years or until age 21, whichever comes first. Youth who are non-delinquent but subject to conditions imposed by the court, such as **minors requiring authoritative intervention**, may receive **supervision** or supervised probation to ensure they follow requirements set by the court.

Probation departments also oversee court-ordered services and programs to which youth probationers are sentenced at disposition. Such services and programs include, but are not limited to, alcohol and drug treatment, mental health treatment, **Treatment Alternatives for Safe Communities, Inc.** (TASC) programs, **Unified Delinquency Intervention Services** programs, and **Job Training Participation Act** programs.

Probationers may also receive **community service** and be ordered to pay victim **restitution** costs. Youth may also be removed from their homes, or in some cases require **placement** in a **foster home, group home, residential treatment center**, or placement with a relative.

## Data summary

### *Probation caseloads*

AOIC collects aggregate-level **active probation caseload** information on the number of youth receiving informal supervision, those whose cases were continued under supervision, and those who are on formal county probation. These data, along with data on services ordered and youth placements, are shown in the data tables section in Appendix H.

Caseloads include only the number of active youth probation cases open on Dec. 31, 2005. A 6 percent decline was recorded in active probation caseloads from 1995 to 2005. There were 10,993 active probation caseloads in 1995 and 10,353 caseloads in 2005.

**Figure 17**  
**Rate of youth probation caseloads per 100,000 youth ages 10-16,**  
**by county classification, 1995-2005**

Source: Administrative Office of the Illinois Courts  
 Note: Rate of formal probation caseloads as of Dec. 31, 2005

The rate of formal probation caseloads statewide decreased from calendar years 1995 to 2005, peaking in 2000 before a slight decline through 2005. In 2005, the state rate of active youth probation caseloads was 805 per 100,000 youth age 10 to 16. The more populated counties of the state drove the recent decrease. *Figure 17* depicts the rate of youth probation caseloads by county classification from 1995 to 2005.

*Map 6* depicts the percent change in the rate of youth probation caseloads in Illinois between 2000 and 2005.

**Map 6**  
**Percent change in rate of youth probation caseloads in Illinois, 2000 - 2005\***

Source: Administrative Office of the Illinois Courts  
 \*As of Dec. 31, 2005.

*Informal probation caseloads*

The state rate of active informal probation caseloads declined from calendar years 1997 to 2005. The state rate of informal probation on Dec. 31, 2005 was 182 caseloads per 100,000 youth ages 10 to 16. Rural counties historically have had the highest rates of informal probation caseloads. Data for Cook County were unavailable for 1995 and 1996.

**Figure 18**  
**Rate of active informal probation caseloads per 100,000 youth ages 10-16, by county classification, 1997 – 2005\***

Source: Administrative Office of the Illinois Courts  
 \* As of Dec. 31, 2005.

The number of active informal probation caseloads statewide increased 2 percent from 2,297 in calendar year 2000 to 2,339 in 2005. A total 30 counties had no active informal probation supervision caseloads in either calendar year 2000 or 2005.

There was a slight increase in the rate of active informal probation caseloads, from 117 per 100,000 youth ages 10 to 16 in 2002, to a rate of 182 per 100,000 youth ages 10 to 16 in 2005. This represents a 56 percent increase in the statewide rate. *Map 7* illustrates rate changes in informal youth probation caseloads in Illinois counties between 2000 and 2005.

**Map 7**

Source: Administrative Office of the Illinois Courts  
 \* As of Dec. 31, 2000, and Dec. 31, 2005.

*Cases continued under supervision*

In Illinois, the court may order a continuance under supervision during court proceedings which may not exceed a 24-month period for youth alleged to be delinquent. During the time of the continuance, the youth must follow conditions of supervision determined by the court (705 ILCS 405/5-615). *Figure 19* shows the trend in rates of cases continued under supervision by county classification from 1995 to 2005. Data for Cook County for CY04 and 2005 were unavailable, which explains the dip in the line graph shown in *Figure 19*.

**Figure 19**  
**Rate of cases continued under supervision per 100,000 youth**  
**ages 10-16, by county classification, 1995 – 2005**

Source: Administrative Office of the Illinois Courts  
 Note: Cook County data for 2004 and 2005 were unavailable.

A decrease was noted in the number of delinquency cases continued under supervision from 2000 to 2005. However, Cook County reported zero cases continued under supervision to the Administrative Office of the Illinois Courts. Without 2005 data on cases continued under supervision in Cook County, statewide trends are difficult to pinpoint. *Map 8* depicts the rate changes of cases continued under supervision by county between 2000 and 2005.

## Appendix H: Data tables section

The following data tables include county-level detail for several dozen juvenile justice data elements. When available, some data elements were also broken down by demographics, such as age, race, and gender. Data is provided by calendar year, academic year, or Fiscal Year, depending upon the reporting agency. Whenever possible, both 2000 and 2005 data were included.

Many caveats have been mentioned throughout this report regarding the interpretation of the following data. The bullet points below describe additional issues that should be considered when reviewing the data tables.

- If there is a blank space where data should be, then data were not available.
- When zero (0) is listed for a particular data element, there are two interpretations
  - There were zero instances of that particular event occurring.
  - Zero instances of that particular event were reported.

For instance: A zero appears for Greene County in the youth arrests table. This could be interpreted as Greene County not having any youth arrests for 2005, or that Greene County did not report any youth arrests to the Illinois State Police, but actually did arrest juveniles.

Whenever possible, rates were calculated by using the population most appropriate to the data element. For example, youth incarceration rates were calculated using the youth population 13-16 since a youth under the age of 13 cannot be incarcerated in an Illinois Youth Center, and youth 17 or older are considered adults in Illinois.
