

Corrections data

Since the Illinois Department of Juvenile Justice did not come into existence until July 1, 2006, the corrections data discussed in this report are for time periods no later than FY05. References are still made to the juvenile division of the Illinois Department of Corrections rather than the Illinois Department of Juvenile Justice.

The Illinois Department of Corrections (IDOC) provides long-term custody in Illinois Youth Centers to youth ages 13 through 16. According to 730 *ILCS* 5/3-10-7(b), a youth may remain within the IDOC Juvenile Division until age 21, unless juvenile division administrators file a petition to transfer the youth to the **adult corrections** division or prison (under the guidelines set forth in 730 *ILCS* 5/3-10-7(a)). In 2005, youth were committed to one of eight Illinois Youth Centers located throughout Illinois (Appendix D). In FY05, the average annual cost of housing one youth in an Illinois Youth Center was \$70,827, although the cost per youth varies considerably across the centers.¹

Data summary

Admissions to IDOC

IDOC data for FY05 were unavailable during compilation of this report. In FY04, 2,771 youth were admitted to an IDOC Youth Center—an increase of 4 percent from the 2,673 admitted in FY00. Seven counties reported no youth admissions to IDOC during FY04.

Map 9 depicts the rate changes in youth admissions to IDOC by county from FY00 to FY04.

Court commitments to IDOC

Court commitments are a subset of all admissions to IDOC. In this report, court commitments to IDOC are defined as **delinquency commitments** or **court evaluations**.² Delinquency commitments, also referred to as initial commitments or new sentences, are given to youth who were adjudicated delinquent and sentenced to IDOC for their offenses. A delinquency commitment is an indeterminate sentence that is assessed during the youth’s stay at an Illinois Youth Center.

Adjudicated delinquents also may be sent to IDOC for court evaluation, a 30, 60, or 90-day commitment used to assess the needs of delinquent youth. Based on the court evaluation, a youth could be released from IDOC custody by a juvenile court judge, or is given a **court evaluation return** to an Illinois Youth Center to serve an indeterminate term.

The state rate of youth court commitments to IDOC increased from FY95 to FY04. In FY04, the state rate of court commitments was 247 per 100,000 youth age 13-16. *Figure 20* depicts the rate of youth who court committed to IDOC, by county classification, from FY95 to FY04.

Figure 20
Rate of youth court commitments to IDOC per 100,000 youth ages 13-16, by county classification, FY95-FY04

Source: Illinois Department of Corrections

In FY04, there were 1,691 court commitments, including 798 delinquency commitments, 821 court evaluations, and 72 recommitments. Of the court evaluations, 211 led to a return to IDOC. In FY04, court commitments represented 54 percent of total IDOC admissions. From FY00 to FY04, delinquency commitments dropped 45 percent from 1,461 to 798. While the statewide rate of youth court committed to IDOC leveled off between 2003 and 2004, the rural rates increased

37 percent, from 611 commitments per 100,000 youth age 13 to 16 in FY03 to 840 commitments in FY04.

In contrast to the decrease in delinquency commitments statewide from FY00 to FY04, a 33 percent increase was seen in court evaluation commitments, from 616 to 821. In FY04, a total of 211 court evaluation returns were recorded. Twenty-six percent of ordered terms in IDOC for a court evaluation resulted in a return to IDOC.

In FY04, 46 percent of court-committed youth were committed for a property offense, 36 percent for an offense against a person, and 12 percent for a drug offense. Of all youth court committed to IDOC, 52 percent were black, 37 percent were white, and 11 percent were Hispanic. Most court committed youth were male (89 percent).

IDOC reports youth recidivism rate as the percentage of youth who return to Illinois Youth Center facilities within three years following their release. Youth who return to an adult IDOC facility or receive any other sentence, such as probation, are not counted in IDOC's youth recidivism rate. In FY04, IDOC reported the youth recidivism rate within three years of exiting an IDOC facility (FY01 release) as 46.6 percent.³

Technical violations

Youth also are admitted to IDOC for technical violations of parole or mandatory supervised release conditions. In FY04, 44 percent of youth center admissions were for technical violations. Of the 3,106 admissions, 1,363 were for technical violations of conditions of parole or mandatory supervised release.

Notes

¹ Illinois Department of Corrections, "2005 Department Data," June 2005: Retrieved November 23, 2007 on the World Wide Web: <http://www.idoc.state.il.us/subsections/reports/default.shtml>.

² Note: Detention officials in Cook County record the number of juveniles admitted for "bring-back orders" (short term determinate sentences to be served at the detention center) and do not record the number of those admitted for court evaluations. However, IDOC officials record the number of juveniles admitted for bring-back orders in Cook County as court evaluations.

Appendix H: Data tables section

The following data tables include county-level detail for several dozen juvenile justice data elements. When available, some data elements were also broken down by demographics, such as age, race, and gender. Data is provided by calendar year, academic year, or Fiscal Year, depending upon the reporting agency. Whenever possible, both 2000 and 2005 data were included.

Many caveats have been mentioned throughout this report regarding the interpretation of the following data. The bullet points below describe additional issues that should be considered when reviewing the data tables.

- If there is a blank space where data should be, then data were not available.
- When zero (0) is listed for a particular data element, there are two interpretations
 - There were zero instances of that particular event occurring.
 - Zero instances of that particular event were reported.

For instance: A zero appears for Greene County in the youth arrests table. This could be interpreted as Greene County not having any youth arrests for 2005, or that Greene County did not report any youth arrests to the Illinois State Police, but actually did arrest juveniles.

Whenever possible, rates were calculated by using the population most appropriate to the data element. For example, youth incarceration rates were calculated using the youth population 13-16 since a youth under the age of 13 cannot be incarcerated in an Illinois Youth Center, and youth 17 or older are considered adults in Illinois.
